1 Canalization
0–300 s
2 Intervention
300–400 s
3 Recanalization
400–700 s
Agent harvests available pellets
New, unharvested pellets appear, far away from the agent
World persists; pellets continue to be harvested
Agent carves out deep canals
Decanalized
Perceptions flatten
Temperature increases
Perception and temperature reset; new canals form; agent thrives
Undisturbed
No disturbances: canals remain
No disturbances: canals remain; agent depletes resources
